

Slumberland

SUPREME COMFORT. ULTIMATE STRENGTH

HOSPITALITY DIVISION

BUILT TO MEET THE RIGOROUS DEMANDS OF THE HOSPITALITY INDUSTRY.
SLUMBERLAND KEEPS YOU AS RELAXED AS YOUR GUESTS WILL BE!

TO SEE OUR FUTURE, LOOK TO OUR PAST

Since 1919 Slumberland has tirelessly worked towards uncovering the secret to a good night's sleep.

Since its introduction in South Africa in 1967, Slumberland has become the bed of choice for South Africans who demand an uninterrupted night's sleep on a comfortable, long-lasting bed.

The Slumberland Hospitality Range of beds has exclusive features and benefits especially designed to meet the rigorous demands of the hospitality industry, making it the preferred sleep partner to Sun International, Legacy and African Sky Group of Hotels, to name but a few.

WHY TOP HOTELS HAVE NO RESERVATIONS IN CHOOSING SLUMBERLAND

Trust Slumberland to deliver the perfect levels of comfort and strength while supporting your guests and your business. Our Policy is much like your own as far as guests are concerned. We want to make an initial great impression and have your guests leave with an even better one.

The following is an explanation of some of the technology that goes into making Slumberland a marvel of comfort and strength.

SUPREME COMFORT

Bug Safe™ Protection

The mattress and base fabric are treated with Bug Safe™ which bugs hate and guests love because it is a complete bedding protection from bed bugs and dust mites:

- Prevents bed bug and dust mite infestations
- Maintains an insect free sleeping environment
- Provides healthy undisturbed Bug Safe™ sleep
- Lasting protection against unwelcome guests

Knit Mattress Fabric

The knit fabric with its luxurious, soft feel is both visually attractive yet provides your guests with a plush comfort feel to enhance their sleep experience. The fabric is elegant yet durable to withstand the test of time.

Jacquard Mattress Fabric

A type of fabric with an intricate design woven into the fibres, rather than printed on its surface, Jacquard fabric is one of the oldest and most sophisticated types of textile materials. Versatile, resilient and easy to clean it makes housekeeping a breeze and thanks to its durable properties it is also a long-term investment.

Luxurious Comfort Layers

Chosen for their strength and durability, the combination of resilient foam and comfortable fibres ensures your guests enjoy a pampered night's rest.

ULTIMATE STRENGTH

Unique InnerAct Support System

Extra support beneath layers of luxury

Slumberland's Unique InnerAct Spring System is designed specifically for deep, restful sleep.

Slumberland's patented InnerACT Spring System operates exceptionally well under pressure. The two-coil system alternates right and left turn coils which neutralizes the coil's tendency to lean in one direction when compressed, providing perfect balance for enhanced comfort and less disturbance when your partner rolls over or shifts.

The InnerACT spring unit is laced head-to-toe which prevents motion across the width of the bed to eliminate partner disturbance.

In addition, InnerACT springs are specially heat treated to maintain their shape, strength and durability.

Whether the bed is to be used by a lightweight, a heavyweight, or both, it will certainly be up to the task of providing many years of restful, comfortable sleep.

The Pocket Spring System

Ultimate Luxury and Individual Conformance

Slumberland's Pocket Spring System is the choice for people who love the feeling of soft, sensual luxury, without having to lose out on support.

Slumberland's Pocket Spring System is built for individual conformance and has a unique stability feature that ensures undisturbed sleep. Unlike conventional mattresses where all the coils are connected, Slumberland's Pocket Springs are individually wrapped (pocketed) and separate so that they can respond individually and independently. The result is a mattress that provides a high level of conformance and comfort, while remaining independent of any motion from a partner.

The mattresses in Slumberland's Pocket Spring range are made with high grade springs that are specially heat treated to maintain their shape, strength and durability. They are then individually pocketed, positioned and covered with layers of luxury fibres and fabrics to provide a sleep experience that offers exceptionally high levels of individual support.

ULTIMATE STRENGTH

Surround Comfort

Encapsulates the spring system to provide greater all round support and comfort whilst increasing the sleep surface.

Firmalator

A resilient, high-quality fiber pad which prevents spring feel and comfort layers from shifting

Flanging

A durable webbing which encircles the mattress and is fastened to the spring system to prevent the comfort layers from shifting.

UNIQUE HOSPITALITY FEATURES

Fire Retardant Mattress Fabric

An added safety feature for your peace of mind, the mattress fabric suppresses, reduces or delays combustion.

Rubber Stoppers at head-end of base

Aligns the base with the headboard and protects the base against bumps and knocks, preventing external damage.

Monthly Turning Sequence

All Slumberland Hospitality mattresses feature a easy to read monthly turning sequence to ensure the mattresses wear evenly and last longer.

2 Rollers and Glides

Firmly attached to the base they assist with mobility for quick, hassle free house keeping.

Flanged Comforter

This durable, easy to fit cover converts two single mattresses into one luxurious king size mattress without any gap or ridge in the middle.

HOTEL BARON

Bug Safe™ Protection
